

Frederik Kristensen

Assistant Associate, Advokatfuldmægtig (Aarhus)

Frederik Kristensen advises on information technology (IT), data protection (GDPR), artificial intelligence (AI), and intellectual property rights (IP).

Frederik helps clients handle complex tech issues, including due diligence processes, drafting of development, operating, maintenance, and software licence agreements, and dispute prevention and resolution. Frederik also had detailed knowledge of AI and data regulation, including the different liability regimes.

He provides privacy law advice to clients, for instance when they enter into IT contracts or experience data security breaches.

Frederik has many years' experience working with residential tenancy law with focus on tenants' rights, and his tenant-oriented approach provides valuable insights for landlords in due diligence processes that involve tenancy law.
